What do you do on a computer?

- eMail
- Facebook
- Games
- Look up information ("Google it")
- Banking & Pay bills
- Make purchases (Amazon & more)
- Skype
- YouTube
- Word / Excel / PowerPoint / MS Office
- Other?

Chromebooks

- Launched 2012
- 2015, the category overtook MacBooks in the U.S.
- Two million units in Q1, 2015
- Fueled by the K-12 education market

Widely Used in Education

- 58 percent of U.S. K-12 schools.
- Windows is in second with around 22 percent and the combined impact of MacOS and iOS are close behind at 19 percent.
- It's a rapidly shifting landscape. Three years earlier, Apple's products represented nearly half of devices being shipped to U.S. classrooms.

Pros

- They boot quickly.
- They're effectively impervious to viruses (though not phishing, so make sure Mom and Dad know to watch for).
- Generally speaking, they're very inexpensive -- usually anywhere from \$200-500 depending on size and features. Can be up to \$1,500.
- Voice commands: You can say "OK, Google" from the launcher to invoke Google's voice-powered assistant.

Pros (con't)

- Tight integration with everything Google: Gmail, Drive, Calendar and so on. That means any document created in, say, Google Docs is automatically archived to Drive. It's like full-time, automatic backup for nearly everything the user does.
- Good battery life.
- Simple keyboards.
- Come with all essential software.
- Easy to carry.

Cons

- There's a bit of a learning curve, especially if Mom and Dad are already accustomed to Windows.
- Printing can be a challenge. Chrome OS doesn't always allow for USB connections, but it does support wireless printing -- provided your printer supports Google Cloud Print. And even if it does, setup isn't always easy.
- Gmail is not everyone's favorite mail client.
- Relies on the Internet.

- 
- 30 million Chromebooks are now used in education (Jan 2019)
 - In Q4 of 2018, Chromebooks made up 21% of all notebooks sold in the US
 - 23% growth year-over-year from 2017 to 2018
 - Estimated 8.9 million Chromebooks shipped worldwide in 2018

There is also growing interest in Chromebooks from businesses in the finance and retail sectors.

Companies are using Chromebooks as no-frills mobile thin clients, considering they are cheap to deploy and easy to manage.

Chrome Web Store vs Google Play

- Chrome Web Store is where you can find thousands of apps, extensions, and themes designed for your Google Chrome browser.
- Google Play lets you browse and shop for your favorite music, movies, and books. You can also download apps and games for your Android phone or tablet.

The number of available apps in the Google Play Store was most recently placed at 2.6 million apps in March 2019, after surpassing 1 million apps in July 2013. Google Play was originally launched in October 2008.

Number of available applications in the Google Play Store from December 2009 to March 2019

6 Reasons Why a Chromebook Should Be Your Next Computer

1 **Portability**
It only weighs 3 pounds. You can take it anywhere!

Battery **2**
Lasts for 10 hours!
No need to carry a charger everywhere.

3 **Google Apps**
All your documents are in the cloud!
They'll save automatically so you can access them anywhere

Performance **4**
Boot up in 5 seconds! No slowdown no matter how much you do.

5 **Security**
No viruses! The Chromebook is always up to date and always safe.

Price **6**
It only costs \$300. No add ons, no extra fees.

GOOGLE DOCS

The screenshot displays the Google Docs web interface within a browser window. The address bar shows the URL <https://docs.google.com/document/u/0/>. The top navigation bar features the Google Docs logo, a search bar, and a user profile icon. Below this, the 'Start a new document' section offers several templates: Blank, Letter Spearmint, Resume Serif, Resume Coral, Project proposal Tropic, and Brochure Geometric. The 'Recent documents' section at the bottom shows three documents: 'test foe db' (opened Apr 18, 2017), 'This is a sample page' (opened Mar 22, 2017), and '12 Things You Should Do ...' (opened Mar 22, 2017).

How to Check the Specs on Your Chromebook

Posted by Robert Hayes on March 21, 2019

Ever since the first Chromebook rolled out back in 2011, the platform has developed a steady following of technophiles. Chromebooks exist in a rather weird space, somewhere in between tablets and notebooks, a space that nobody knew we needed until Google pushed the

CHROMEBOOK HELP

The image shows a browser window displaying the Chromebook Help page. The page has a clean, modern design with a white background and a blue accent color. On the left side, there is a vertical navigation menu with a search bar at the top. The menu items are: Discover (highlighted in blue), Get started, Getting online, Personalization, App replacements, Chrome web apps, Android apps, Connecting devices, Photos, Printing, Entertainment, and Fix a problem. At the bottom of the menu is a blue button labeled "Contact support". The main content area features a large heading: "Discover how to make the most of your new Chrome device". Below the heading is a photograph of three Chromebooks displaying scenic nature images. Underneath the photo is a downward-pointing arrow icon. At the bottom of the main content area, there is another heading: "Video chat and phone calls", followed by the text "Hangout with up to 9 people at the same time".

Articles

The screenshot shows the CB4S website layout. At the top, there is a navigation bar with links for HOME, ABOUT, BLOG, ARTICLES, LINKS, TUTORIALS, and CONTACT. Below the navigation, there is a search bar and a 'RECENT POSTS' section. The main content area features several article thumbnails, each with a title, a small image, and a brief description. The articles include:

- WHAT IS A CHROMEBOOK? WHY IS IT THE PERFECT COMPUTER FOR PARENTS & GRANDPARENTS?** - This article discusses the benefits of Chromebooks for older users, highlighting their ease of use and security features.
- THE VIRTUAL CHROMEBOOK MEETUP** - This article reports on a virtual meeting where users shared their experiences with Chromebooks.
- 7 REASONS YOU NEED TO TRY VOICE TYPING IN GOOGLE DOCS** - This article lists seven reasons why voice typing is a useful feature in Google Docs, particularly for users with mobility issues or those who prefer hands-free operation.
- TOP 10 CHROME BOOKS MONTHLY** - This article provides a list of the top 10 Chromebooks available in the market for a given month.

On the right side of the page, there are sections for 'RECENT COMMENTS', 'ARCHIVES' (listing months from August 2017 to August 2018), and 'CATEGORIES' (listing various topics like Chrome OS, Google Docs, etc.).

The Remedy for the Aches & Pains of Computing

WHAT IS A CHROMEBOOK? WHY IS IT THE PERFECT COMPUTER FOR PARENTS & GRANDPARENTS?

Simple and secure, the Chromebook makes getting things done in and out of the classroom, at work, or at home quick, easy, and affordable. Chromebooks were introduced in June 2011. In just a short time they now comprise 58% of the computers used in K-12 school classrooms. For the parent or grandparent, this relatively inexpensive computer is far easier to use than a full-featured Windows or Mac computer would be.

They're effectively impervious to viruses. They can use Voice commands: You can say "OK, Google" from the launcher to invoke Google's voice-powered assistant. There is tight integration with everything Google: Gmail, Drive, Calendar and so on. That means any document created in, say, Google Docs is automatically archived to Drive. It's like full-time, automatic backup for nearly everything the user does. The most recent Chromebooks can use Google Play to install almost all Android Apps that are available for phones and tablets.
